Advanced Data Modelling and Form Design

Aim

To extend Vehicle Service Management in Zoho Creator with advanced fields for service-center lookup, vehicle photos, repair tasks, service estimates, media uploads, rich text, and customer signatures.

Theory

Advanced data modelling uses specialized field types to collect, validate, and manage detailed vehicle-service information.

In this experiment, the basic Vehicle Service Management is extended with advanced sections. These sections demonstrate the use of lookup fields, image upload, file upload, decimal/number fields, sub forms, URL fields, media upload, fee-related fields, rich text fields, and digital signature fields.

The advanced form contains the following sections:

- **Section E — Service Center & Vehicle Verification**
- **Section F — Repair Details & Media**
- **Section G — Service Estimate & Billing**
- **Section H — Declaration & System-Generated Values**

Sections and Fields Section E — Service Center & Vehicle Verification

> Service Center Lookup (Lookup field, auto-fills from master Service_Centers table)

> Vehicle Photo (Image field)

> Previous Service Record Upload (File Upload field)

> Odometer Reading (Decimal field)

Section F — Repair Details & Media

> Service Task Details (SubForm field, repeating rows)

> Parts Reference URL (URL field, for vehicle parts and manufacturer references)

> Vehicle Condition Video (Video field, optional)

> Customer Issue Voice Note (Audio field, optional)

Section G — Service Estimate & Billing

> Requires Additional Repairs (Decision Box)

> Estimated Service Cost (Currency field)

> Service Tax Rate (Percent field)

> Estimated Final Bill (Formula field, read-only, auto-computed)

Section H — Declaration & System-Generated Values

> Service Estimate Display (Rich Text field, read-only reference block)

> Customer Approval Signature (Signature field)

> Service Requested On (Date-Time field, auto-captured)

> Service Request ID (Auto Number field, system-generated)

> Service Tracking QR Code (QR/Barcode field, system-generated from Service Request ID)

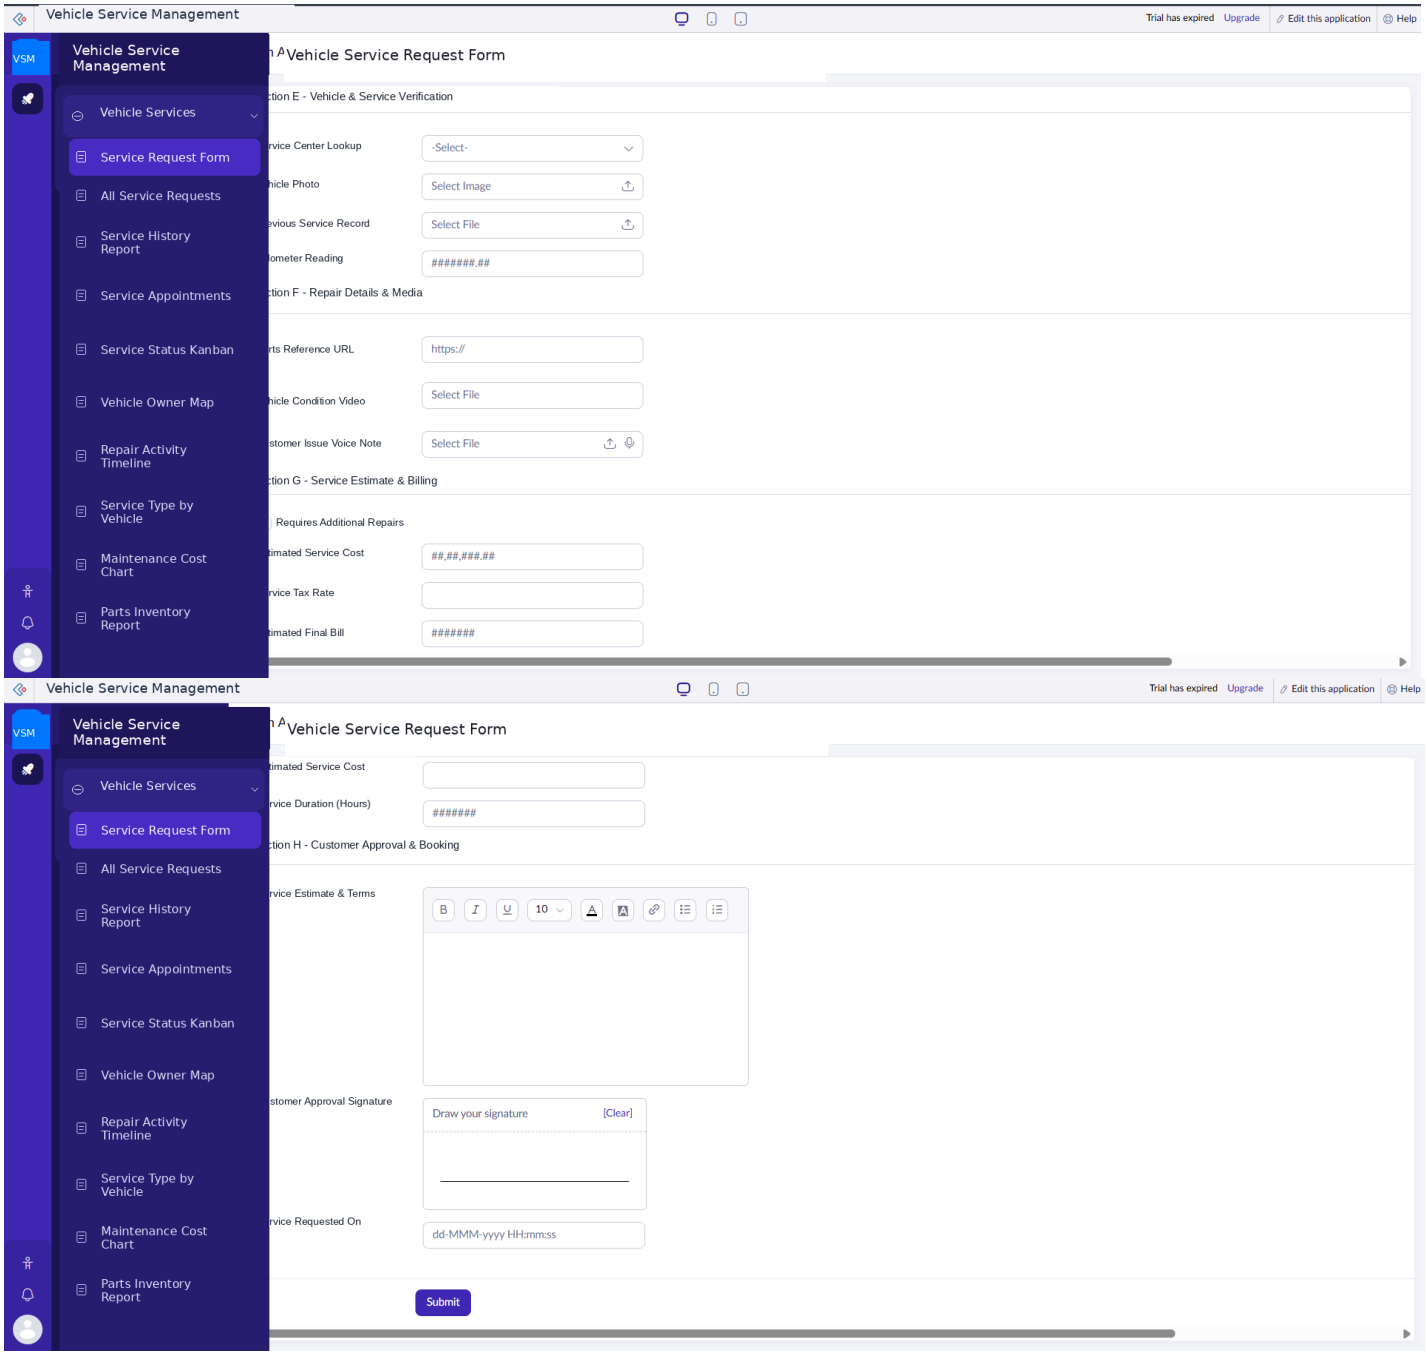

Procedure:

1. Open the Vehicle Service Management application in Zoho Creator.
2. Add Section E – Service Center & Vehicle Verification.
3. Add the Service Center Lookup field.
4. Add the Vehicle Photo image upload field.
5. Add the Vehicle Registration Document Upload file field.
6. Add the odometer reading in numeric field.
7. Create Section F – Repair Details & Media.
8. Add a Sub Form for service task details.
9. Configure Task Name, Required Part, and Assigned Technician inside the Sub Form.
10. Add the Parts Reference URL field.
11. Add the vehicle condition video upload field.
12. Create Section G – Service Estimate & Billing.
13. Add the Requires Towing checkbox.
14. Add the service deposit paid field.
15. Add the Service Discount Percent field.
16. Create Section H – Declaration & System-Generated Values.
17. Add the Service Estimate Display rich text field.
18. Add the customer Digital Signature field.
19. Configure the required advanced field properties and validations.
20. Save and preview the completed form.

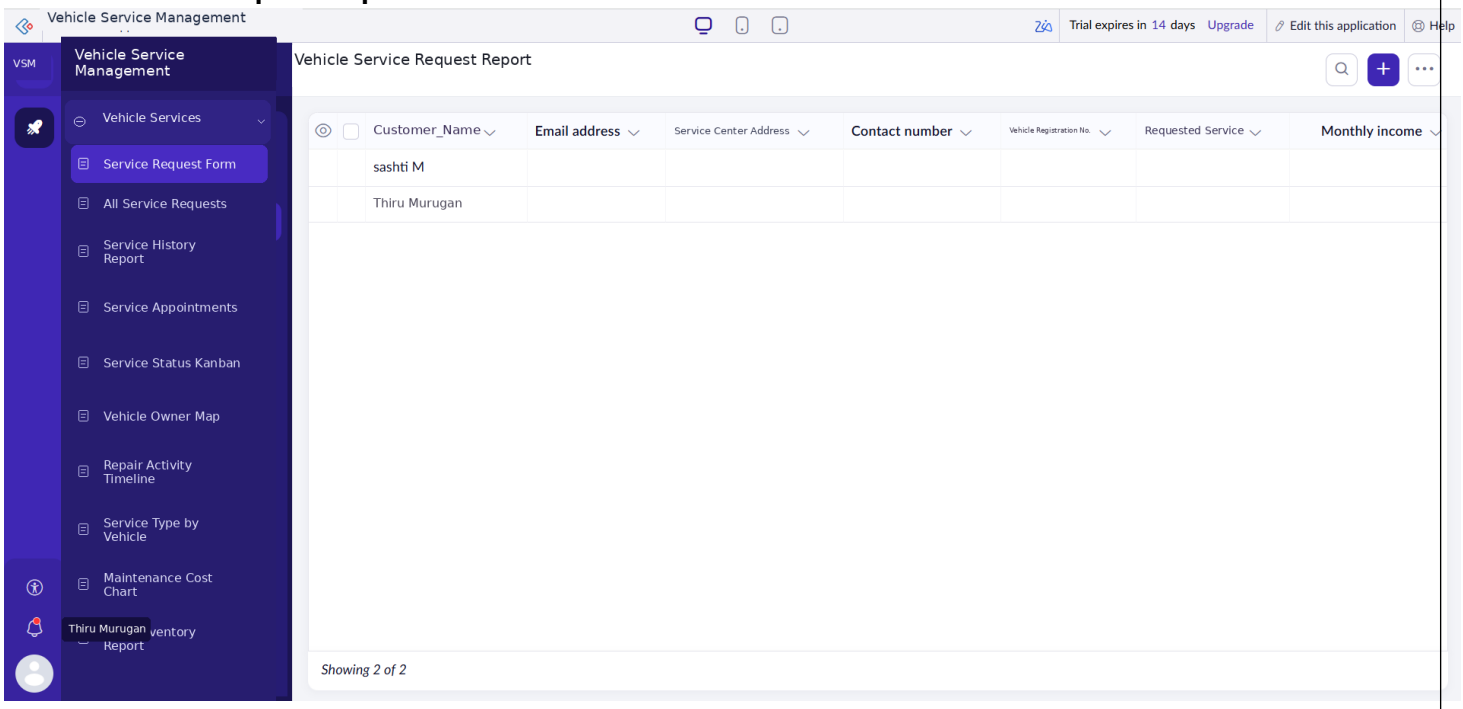

21. Enter sample data into the advanced fields.
22. Add sample service tasks through the Sub Form.
23. Upload the required image/file information.
24. Provide the required parts URL, service estimate, towing option, declaration, and customer signature.
25. Submit the completed form.
26. Verify the submitted information in the Vehicle Service Request Report.

Result

The Vehicle Service Management was successfully created in Zoho Creator with a structured data model, appropriate validations, and organized sections. Service records were successfully submitted and displayed in the Vehicle Service Request Report, enabling efficient vehicle verification and service tracking.
